Il marchio Aluform® è da sempre sinonimo di prodotti di alta qualità, che si è conquistato un ruolo di prestigio nel mercato delle porte d'ingresso.

L'universo che ci circonda costituisce la nostra principale fonte d'ispirazione per lo sviluppo di nuove proposte secondo un moderno concetto di casa.

Esplorare nuove tendenze per progredire costantemente nel segno dell'innovazione e della qualità tangibile, è la nostra filosofia.

The trademark Aluform® has always been synonymous of high quality products that has acquired a prestigious rule in the market of entrance doors.

The universe that surrounds us constitutes our main source of inspiration for the development of new proposals according to a modern concept of the house.

Exploring new trends to be constantly advancing in the world of innovation and tangible quality, this is our philosophy.

Da sempre con il marchio Aluform firmiamo le migliori porte d'ingresso. In molti cercano di imitarci, ma la qualità e lo stile dei nostri prodotti sono caratteristiche inconfondibili ed inimitabili. Controllate sempre che la vostra porta sia corredata del nostro certificato di autenticità.

We have always autographed the best entrance doors with the trademark Aluform. Many try to copy us, but the quality and style of our products are characterised as unmistakable and inimitable. Make sure that your door is accompanied by our authenticity certificate.

**GARANZIA 10 ANNI
GUARANTEE 10 YEARS**

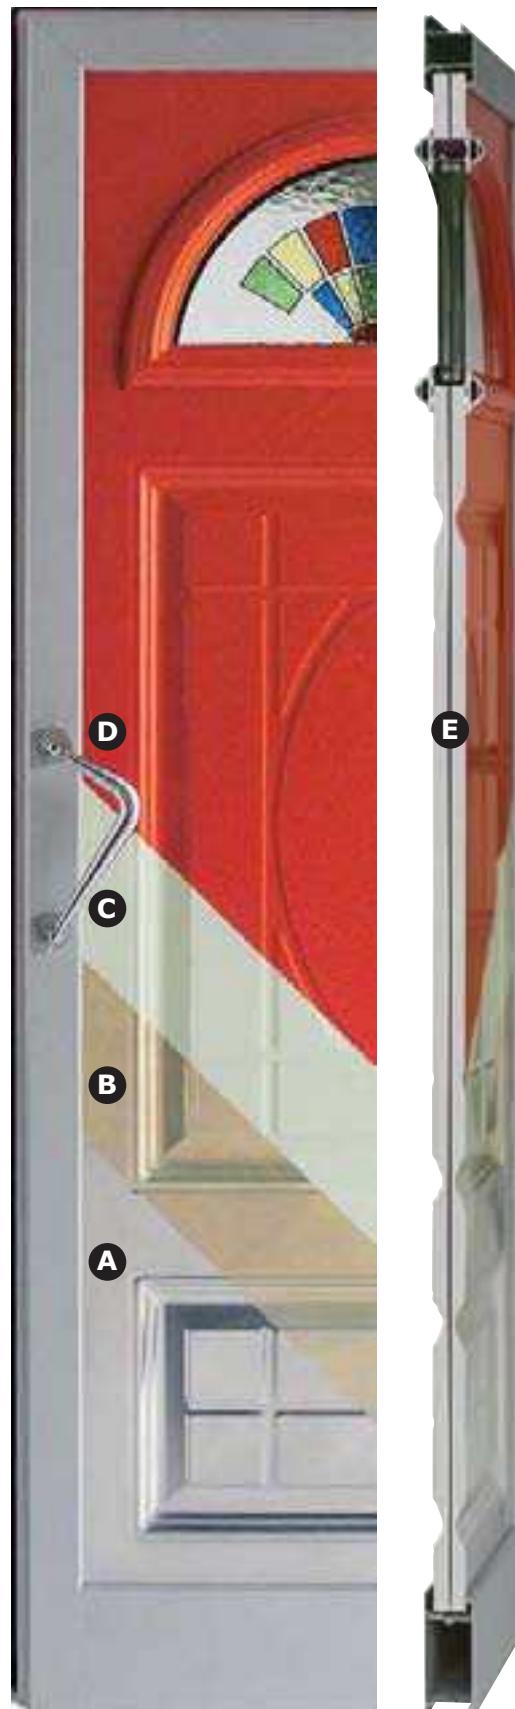

I pannelli ALUFORM in PIRALL®, sono garantiti per 10 anni da eventuali alterazioni causate da infiltrazioni d'acqua.

ALUFORM panels in PIRALL®, are guaranteed for 10 years against eventual alterations caused by water infiltration.

Dopo la certificazione UNI EN ISO 9002 ottenuta già nel 2000, abbiamo raggiunto anche l'obiettivo della certificazione del Sistema di Gestione per la Qualità, in accordo alla nuova norma internazionale UNI EN ISO 9001:2000 (Vision 2000), per la capacità di fornire prodotti e servizi conformi alle aspettative dei nostri Clienti ed ai requisiti di legge applicabili. Nonostante questo significativo riconoscimento, il nostro maggiore motivo di orgoglio resta la fiducia dimostrata quotidianamente dai nostri Clienti.

After the UNI EN ISO 9002 certification was obtained in 2000, we have also reached the objective of the System of Quality Management, in accordance with UNI EN ISO 9001:2000 (Vision 2000), the new international regulations, this enables us to supply products and services which conform to our Clients' expectations and the requests of the applied law. Other than this important recognition, our main reason to be proud is as always the trust placed in us daily by our Clients

Per essere inattaccabili dal tempo e dagli agenti atmosferici, le lastre d'alluminio hanno bisogno di specifici trattamenti anticorrosivi sia all'esterno che all'interno, e cioè sulla superficie che resta a contatto con il nucleo centrale del pannello.

Il nostro sistema prevede:

- A) lastra in alluminio.**
- B) fosfocromatazione.**
- C) verniciatura protettiva al titanio.**
- D) verniciatura a polveri poliesteri.**
- E) nucleo centrale del pannello.**

Il tutto viene ripetuto in entrambi i lati delle due lastre in alluminio.

To make them immune from time and weather, the aluminium sheets need specific rustproofing treatments on both the outside and the inside – the surface that remains in contact with the central nucleus of the panel.

Our system includes:

- A) an aluminium sheet.**
- B) phosphochromatising.**
- C) titanium-based protective paintwork.**
- D) painting with polyester powders.**
- E) central nucleus of the panel.**

All this is repeated on both sides of the two aluminium sheets.

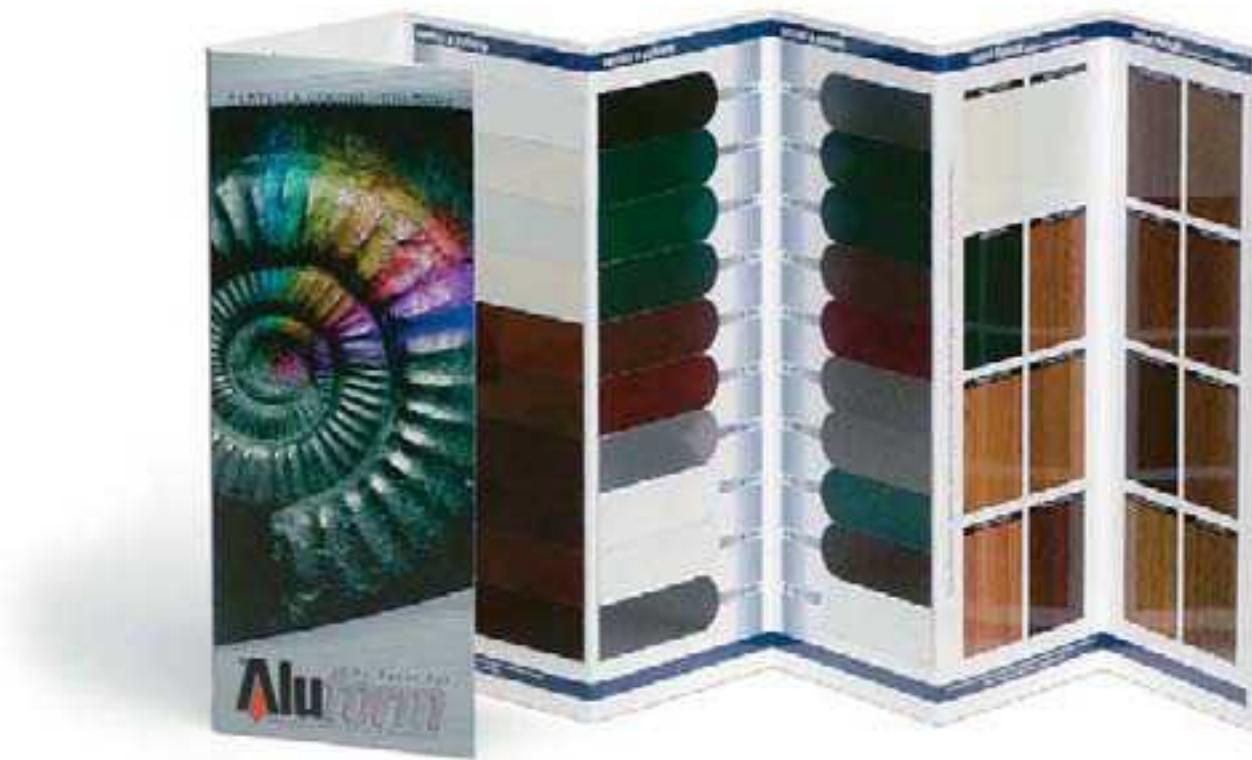

Un'infinita gamma di colori consente di personalizzare la Vostra porta secondo gli stili ed il contesto architettonico che la circonda. Particolamente interessanti sono le colorazioni effetto legno realizzate con pellicole Renolit, oppure i colori verniciato legno, che uniscono i vantaggi dell'alluminio al calore del legno.

Per i verniciati legno, dobbiamo però informarvi che, in questo genere di colori come per i colori anodizzati, per via delle speciali tecniche di verniciatura con cui vengono realizzati, non possiamo garantire l'uniformità della tonalità dei colori fra diversi lotti di produzione. Rientrano pertanto nella normalità e non possono quindi essere oggetto di contestazione, differenti tonalità di colore fra pannello e telaio della porta e/o fra pannello e cornice del vetro.

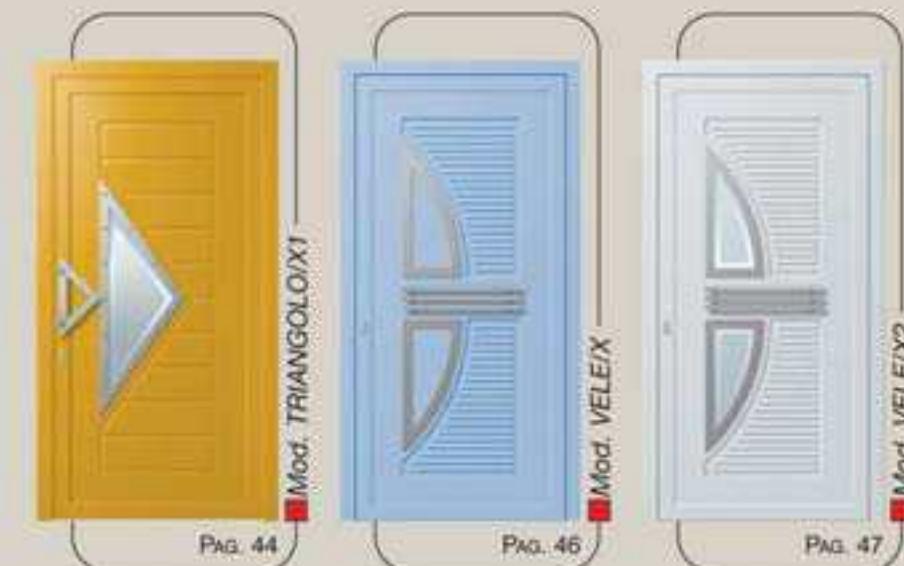

An infinite range of colours allows us to customize your door to fit in with the styles and architectural context that surrounds it.

What are particularly interesting are the colouration possibilities in a wood effect, which are realised with Renolit pellicles, or the coloured woods, that unify the advantages of aluminium with the warmth of wood. However, we must inform you that for the wood colours as for the anodized colours, because of the special painting techniques they are produced in, we cannot guarantee a colour tone uniformity from one production lot to another.

However, different colour tonalities between panel and door frame and/or between panel and glass frame are in the normality and therefore cannot be an object of complaint.

Cartella colori Ral e Renolit

style

Avanti nel tempo con un design innovativo e raffinato.

Materiali classici come acciaio, alluminio e vetro, riscoperti ed abbinati fra loro con arte e ricercatezza per una porta d'ingresso intesa come moderno complemento d'arredo della vostra casa.

La forza di rivelare nuovi modi di essere per un prodotto che esprima sempre ed inequivocabilmente la Vostra esclusiva personalità.

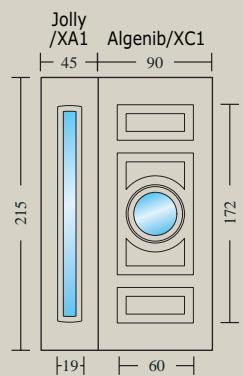

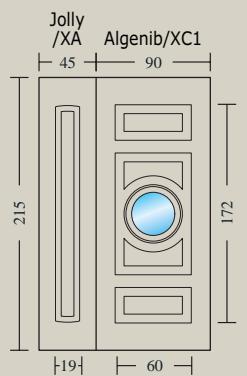

Getting on in time with an innovating and refined design. Classical material like steel, aluminium and glass, found again and coupled with art and elegance for a front door, evolved like a modern furnishings complement for Your home. The strength to reveal new way of being for a product that expresses, always and clearly, Your exclusive personality.

exit

Non solo porte d'ingresso per abitazioni: con il programma Exit le vostre esigenze prendono finalmente forma. Porte di servizio di edifici pubblici, industriali, e commerciali possono contare su un prodotto innovativo, con soluzioni inedite e dal design essenziale. Exit coniuga soluzioni estetiche e versatilità come nella tradizione dei prodotti Aluform.

Not only front doors for Your home: your requirements take shape with the Exit program finally. Back-doors of public building, manufacturers, and trade can make confidence on an innovative product, with new solutions and essential design. Exit joins beauty and versatility solutions, like in the tradition of all Aluform products.

accessori

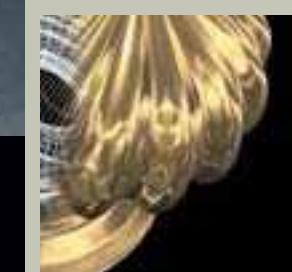

Per la vostra porta chiedete sempre accessori originali Aluform. Le nostre proposte non sono mai affidate al caso: da sempre selezioniamo i migliori prodotti per garantirvi coerenza nel design ma anche e soprattutto funzionalità ed inalterabilità nel tempo.

For Your door, demand always Aluform original accessories. Our propose are never entrusted to the case: we select always the best products to guarantee an harmony design but also and above functional and unchanging characteristics in the long run.

Collezione P.V.D.

Le maniglie e gli accessori in PVD sono realizzati con ottone vissuto ed invecchiato per azione naturale degli agenti atmosferici. Questa particolare linea di prodotto è ottenuta mediante un trattamento manuale che non contrasta eventuali processi di ossidazione.

P.V.D. Collection

Collezione Classic

A chi piace lo stile inconfondibile degli accessori classici in ottone vissuto ed invecchiato per azione naturale degli agenti atmosferici. Questa particolare linea di prodotto è ottenuta mediante un trattamento manuale che non contrasta eventuali processi di ossidazione.

Classic Collection

Collezione Cromo satinato

Una linea di maniglie ed accessori di colorazione moderna e resistente, realizzata attraverso un bagno al cromo, successivamente spazzolato mano per ottenere un effetto di satinatura irregolare. La resistenza all'ossidazione di questi accessori è particolarmente elevata ma non illimitata.

Satined-Chrome Collection

Collezione Inox

Maniglie ed accessori unici ed indistruttibili realizzati in acciaio inox Aisi 316, la migliore lega dell'acciaio inossidabile.

Inox Collection

Our PVD handles and accessories are made with best quality brass. A special titanium protecting treatment blocks every possible oxidation process of the brass that will be bright like a new one and for all its life.

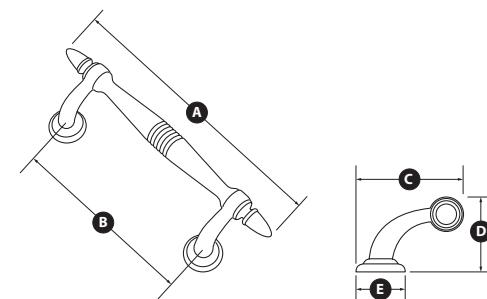

The brand for every one loves the unmistakable style of classic accessories in lived and aged brass by share natural of the atmospheric agents. This particular line of product is obtained by means of a manual treatment that does not contrast the eventual processes of oxidation.

A brand of handles and accessories of realized modern and resistant coloration through a chrome-bath and brushed by hand subsequently, to obtain an irregular effect of glazing. The resistance to the oxidation of these accessories is particularly elevated but not limitless.

Nelle porte blindate, oltre al pannello, sono di fondamentale importanza anche gli accessori complementari di rifinitura: cornici per vetro, gocciolatoi, profili di battuta per le due ante, coprifili, rivestimenti per montanti e traversi, ecc. Il programma Aluform prevede tutte queste soluzioni realizzate su misura e dello stesso colore del pannello.

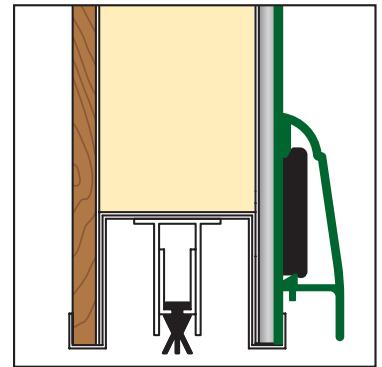

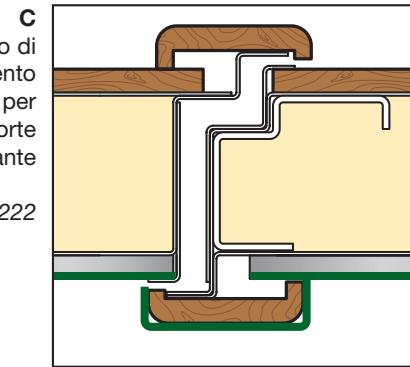

In the armoured doors, the complementary finishing accessories have a basic importance besides panels: frame for glass, drips, beating frames for both wings, wires cover for jamb and transoms, etc. The Aluform program provides for all these solutions made to measure and on the same colour of the panel.

[TORNA ALL'INDICE](#)[AVANTI](#)[INDIETRO](#)
Limitazioni di utilizzo dei pannelli su porte con telai a taglio termico.

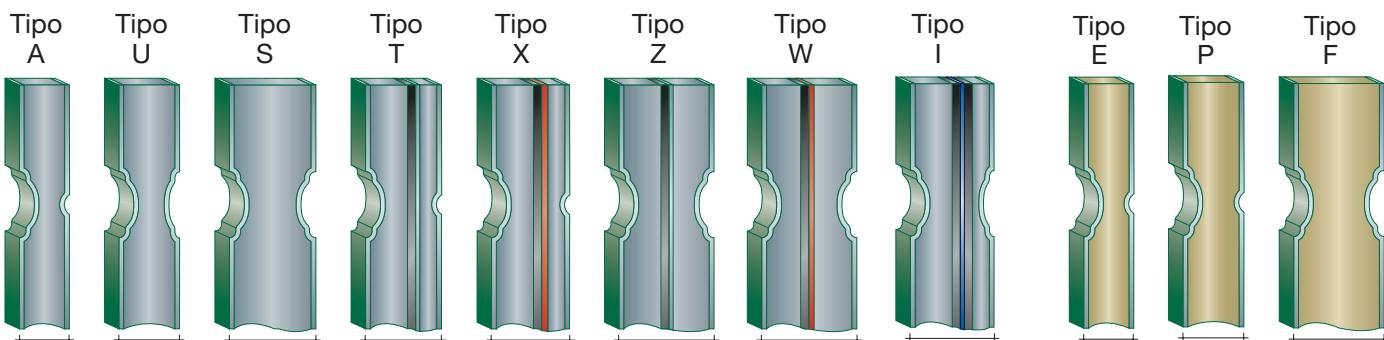

La dilatazione termica derivante dall'irraggiamento solare della faccia esterna della porta, può causare una flessione verticale della porta (pannello e telaio) nel lato di apertura, quindi il conseguente bloccaggio temporaneo dei rostri della serratura. Per limitare questo fenomeno,

consigliamo di utilizzare pannelli nella tipologia a giunto elastico, non superare una altezza anta di 215 cm compreso il telaio mobile e preferire possibilmente l'installazione di serrature con rostri ad avanzamento frontale e cilindro a sforzo rapportato. Non sono da evidenziare particolari disposizioni sulle porte realizzate nel colore bianco o con telai "freddi" (non a taglio termico).

Restrictions of utilization of panels for front doors with thermic-cutting frames.

Thermic dilatation for sun irradiation on the outside of the doors, can be the cause of the vertical flexion of the door (panel and frame) in the opening side, so the consequent temporary jamming of the lock-bills. To limit this symptom, we suggest using our panels with elastic joint, not exceeding cm.215 for the wing-height included movable frame and preferring installation of locks with front-advancement bills and cylinder with refereed effort. Any particular advices aren't necessary for doors white painted or built with "cold" frame (instead of thermic-cutting).

[INDIETRO](#)

I pannelli Aluform monofaccia nella sezione Tipo K e Tipo Q sono studiati per la realizzazione di porte in alluminio esterno e legno interno. I due panelli di materiali diversi, possono avere comportamenti differenti fra loro, consigliamo pertanto di non incollare il pannello in alluminio con quello in legno.

Our mono-side Aluform panels in the type K and type Q section are planed for the realization of doors aluminium-outside and wood-inside. As since both panels are in two different material, can have different behaviour and so we suggest not sticking aluminium panels with wood one.

*dimensioni e caratteristiche
dei pannelli da pagina 193*

[TORNA ALL'INDICE](#)[AVANTI](#)[INDIETRO](#)

I pannelli Aluform nella sezione Tipo U e Tipo P hanno un nucleo centrale di isolamento rispettivamente in Pirall o MDF, assemblato a lastre di alluminio rivestite con pellicole Renolit effetto legno. Aluform ha scelto il sistema di applicazione delle pellicole Renolit con procedimento a freddo. L'applicazione a freddo infatti è reputato il miglior sistema di incollaggio delle pellicole Renolit, in quanto non altera le caratteristiche di resistenza agli agenti atmosferici, che hanno reso famose queste pellicole.

Our Aluform panels in Type U and Type P section have a central part of isolation respectively in Pirall or MDF, put together aluminium sheets covered by Renolit wood-effect film.

Aluform has chosen the cold procedure for the Renolit film application.

Infact, the cold application is considered the best sticking system for Renolit film, as it doesn't change the resistance characteristics to the atmospheric agents, that made famous these films.

dimensioni e caratteristiche
dei pannelli da pagina 193

Le porte basculanti, in abbinamento coordinato alle porte d'ingresso, sono un'altra interessante proposta per l'applicazione dei pannelli Aluform.

Per installare i pannelli Aluform, la porta basculante deve avere il telaio perimetrale che possa contenere i pannelli ed i montanti verticali per la giunzione modulare fra gli stessi.

Il pannello Tipo A pesa circa 9 kg al metro quadrato e può essere richiesto nelle misure massime di 1100 X 2500.

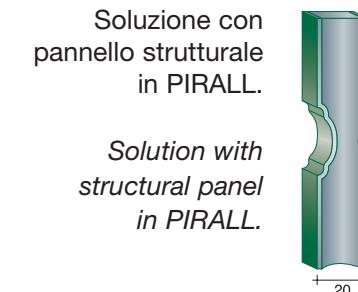

The pivoted doors, coupled to the front doors, are an other interesting propose for the utilization of Aluform panels.

For putting on our Aluform panels, the pivoted doors must have a perimetrical frame able to keep the panels and the vertical jambs for their modular joining.

The weight of the Type A panel is about kg.9 for square metre and can be required in the maxim dimension mm.1100x2500.

Il PIRALL è un materiale affidabile, leggero e con caratteristiche di isolamento termico incomparabili. Queste eccellenti proprietà sono ottenute da una particolare formulazione di schiume rigide con speciali additivi che conferiscono al prodotto eccezionali caratteristiche meccaniche; inoltre, è esente da C.F.C. e vanta una reazione al fuoco di classe B2.

Il PIRALL è stato studiato dalla ROYAL PAT in collaborazione con aziende chimiche all'avanguardia e nel pieno rispetto delle più rigorose leggi in materia ambientale.

PIRALL is a light and reliable material with incomparable thermic insulation specifications. These properties were obtained from a unique formulation of rigid foams with special additives which give the product exceptional mechanical characteristics; it is also CFC-free and has a fire rating of Class B2.

PIRALL was developed by ROYAL PAT in collaboration with leading chemical companies in full compliance with the most rigorous laws on the environment.

GARANZIA 10 ANNI GUARANTEE 10 YEARS

I pannelli con isolamento in PIRALL sono garantiti 10 anni da rigonfiamenti o alterazioni dovute ad eventuali infiltrazioni d'acqua.

The panels with insulation in PIRALL are guaranteed for 10 years from swelling or alterations due to the infiltration of water.

Altre caratteristiche del PIRALL®:

- Resistenza alla compressione (ISO 844) kPa 2600 ± 200;
- Conduttività termica a 10 C (ISO 8301) mW/m K 31;
- Assorbimento d'acqua (ISO 2896) %3;
- Stabilità dimensionale spessore 48h a 100 (ISO 2796) 1,0;
- Temperatura massima d'esercizio C + 120 -180;
- Reazione al fuoco (DIN 4102) classe B2 (ISO 3582) mm <30.

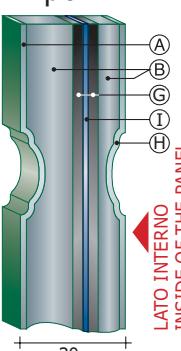

Other features of PIRALL®:

- Resistance to compression (ISO 844) kPa 2600 ± 200;
- Thermal conductivity at 10 C (ISO 8301) mW/m K 31;
- Absorption of water (ISO 2896) %3;
- Dimensional stability of thickness 48h at 100 (ISO 2796) 1.0;
- Maximum operating temperature C + 120 -180;
- Fire rating (DIN 4102) class B2 (ISO 3582) mm <30.

NEW GENERATION

Tipo I

PANNELLO FONOISOLANTE

Aluform è attenta alle crescenti esigenze per la sicurezza passiva e la salvaguardia della salute. Per questo motivo abbiamo aggiunto alla nostra ampia gamma di prodotti il pannello Tipo I. I come isolamento totale con soluzioni di isolamento termico ma anche e soprattutto di isolamento acustico. Un prodotto in grado di rivoluzionare con la massima semplicità il modo di interpretare la casa, protetti dagli sbalzi di temperatura e liberi dall'inquinamento acustico. Una risposta concreta alle nuove esigenze del cliente, sempre più sensibile a questo tipo di valori.

PHONO INSULATING PANEL

Aluform pays attention to the increasing needs for passive safety and health safeguard. For this reason we have added to our wide range of products the panel type I section. I means total isolation with thermic isolation solutions but also and moreover acoustic isolation. A new product able to revolutionize own way of meaning the home with simplicity, protected from sudden change and acoustic contamination free. A concrete answer for the new customer needs, always more sensitive to these kind of values.

termoisolante fonoisolante indeformabile

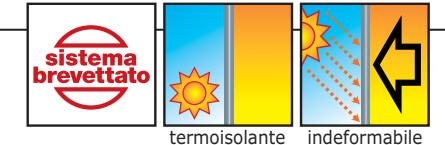

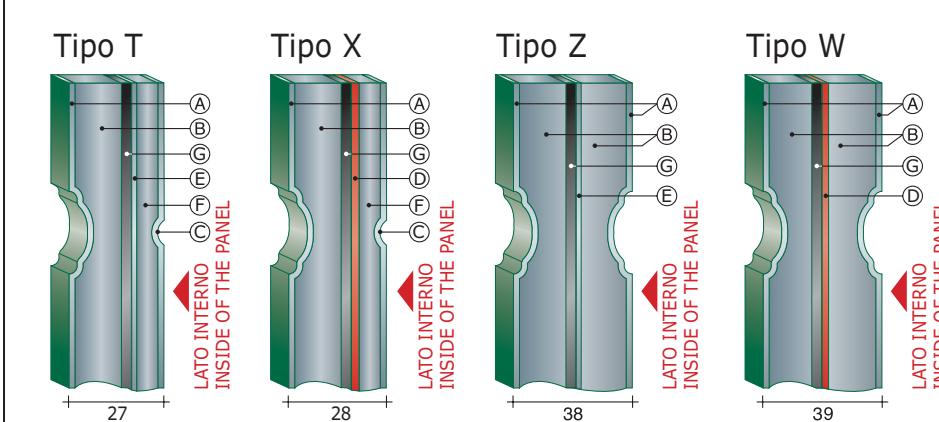

Misure standard:
90x215 e 45x215
Misure maggiorate:
110x230 e 55x230

Standard dimension:
90x215 and 45x215
Oversize dimension:
110x230 and 55x230

PANNELLI A GIUNTO ELASTICO

I pannelli in PIRALL a giunto elastico sono studiati per limitare il fenomeno della dilatazione termica derivante dall'irraggiamento solare.

Misure standard: 90x215 e 45x215

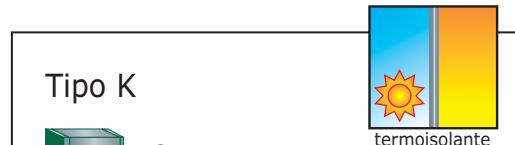

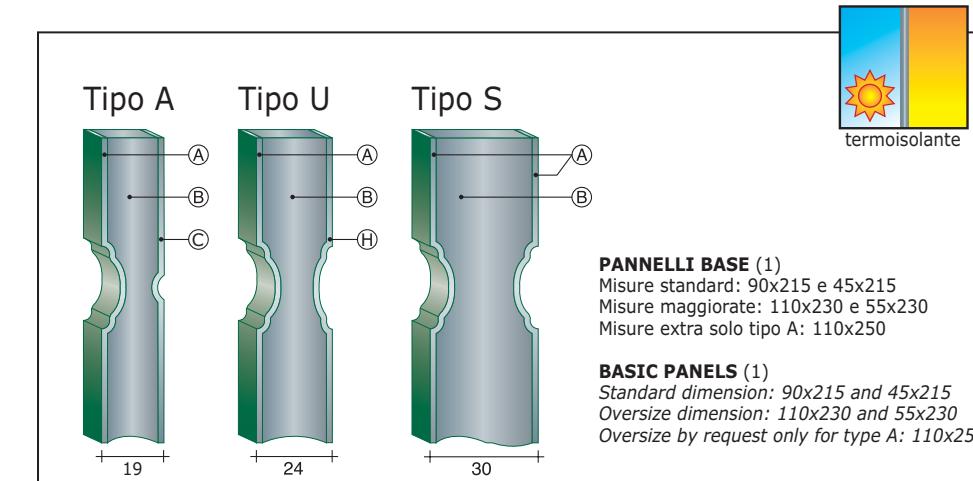

Misure maggiorate: 110x230 e 55x230

PANELS WITH ELASTIC JOINT.

Our panels in Pirall with elastic joint are developed to limit the thermic dilatation symptom for sun irradiation.

Standard dimension: 90x215 and 45x215

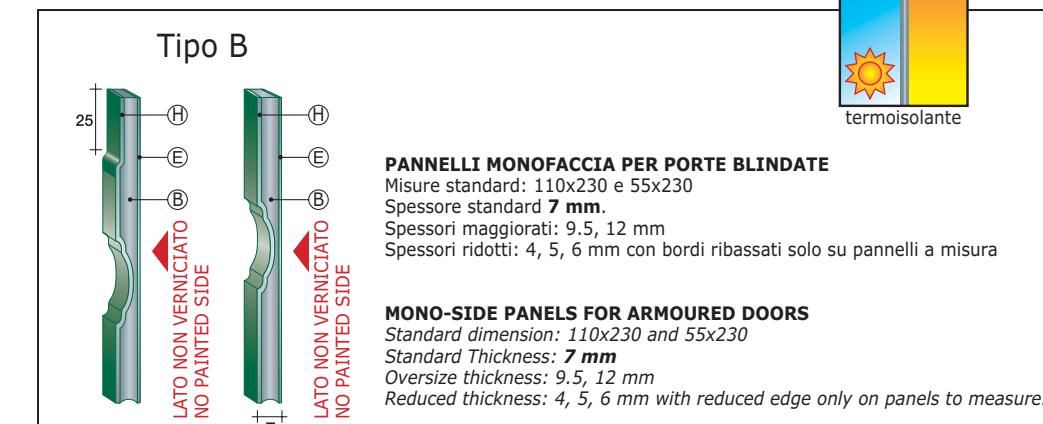

Oversize: 110x230 and 55x230

PANNELLI BASE (1)
Misure standard: 90x215 e 45x215
Misure maggiorate: 110x230 e 55x230
Misure extra solo tipo A: 110x250

BASIC PANELS (1)
Standard dimension: 90x215 and 45x215
Oversize dimension: 110x230 and 55x230
Oversize by request only for type A: 110x250

pannelli con supporto in MDF panels with MDF support

L'MDF è un materiale composto principalmente da fibre di legno "legate" fra loro con particolari resine. Per la semplicità nelle lavorazioni, reperibilità e costo contenuto, l'MDF è il materiale più utilizzato nella costruzione di pannelli bugnati in alluminio. Occorre però precisare che l'MDF, anche se molto diffuso nella costruzione di prodotti per l'arredamento, non è un materiale con specifiche qualità di isolamento termico né possiede caratteristiche di idrorepellenza tali da garantire assenza di rigonfiamento in caso di assorbimento di umidità. Pertanto, non possiamo offrire particolari garanzie di inalterabilità nel tempo sui prodotti realizzati con supporto in MDF.

The MDF is made up wood-fibre put on together by specific resin. For the easy manufacture, available and low cost, the MDF is the most used product in aluminium embossed panels construction. Anyway, it's necessary to specify that the MDF, although its widespread in furnishing products, has neither specific thermic isolation quality nor waterproof characteristics such as to guarantee blowing up free in humidity absorption cases. So, we cannot offer particular unchanging warranty in the long run on our products made with MDF support
